

Deployment of Machine Learning Models

Section 5.5 Notes

Commands

Create virtualenv:

```
python -m venv ENVIRONMENT_NAME
```

Activate virtualenv (Windows):

(cd into the directory where you created the virtualenv):

```
ENVIRONMENT_NAME\Scripts\activate
```

Activate virtualenv (OS X / Linux):

```
source ENVIRONMENT_NAME/bin/activate
```

Deactivate virtualenv:

```
deactivate
```
